NORFOLK LUNATIC ASYLUM.

Medical Superintendent's Annual Report.

FOR THE YEAR, 1874.

TO THE COMMITTEE OF VISITORS.

I have much pleasure in laying before you my Annual Report of this Asylum, including the usual statistics.

On December 31st, 1873, the total number of inmates was 447, of whom 181 were men, and 266 women. During the year, 44 men, and 83 women were admitted for the first time; 7 men and 20 women were re-admitted, making a total of 154 admissions for the 12 months, 51 of these being men, and 103 women. The number of patients under treatment during the year was 601, of whom 232 were men, and 369 women; 22 men were discharged, all of whom had recovered. In the same period 47 women were discharged, of whom 44 were cured, and 3 relieved; 27 men and 28 women died, making with the 69 discharged, a total of 124 who left the Asylum in the course of the year, and of these, 49 were men and 75 women; leaving on our books on December 31st, 1874, 477 patients, 183 being males, and 294 females.

The average daily number resident, in the Asylum, was 179 for the men, and 280 for the women.

The admissions were 15 in excess of the previous year, and include the 14 female lunatics, who returned to us from the Northampton Asylum.

Comparing the numbers in the Asylum on December 31st, 1873, with those of the corresponding date of 1874, will show an increase of 2 on the male, and 28 on the female side of the house; but deducting the 14 females re-admitted from the Northampton Asylum, there is only a net increase of 14 female lunatics.

Of our 154 new cases, 38 seemed to be due to inherited taint, and 11 to Congenital Insanity; in 19 there was Epilepsy, with the insane neurosis, in 7 intemperance was the exciting cause, and in 5 Senile Cerebral Degeneration.

The recoveries were 43.70 per cent. on the Men's side, 47.4 on the women's, showing a mean of 45.54 per cent. of those admitted. The mortality was unusually high, being 12.75 per cent. of the average daily number of inmates, the per-centage being 13.70 on the men's side, and 11.20 on the women's. The causes of death were in 24 Cerebral Disease, in 2 mania with exhaustion, in 9 Pulmonary Consumption, in 7 Disease of the Heart, in 4 Inflammation of the Lungs, in 1, Acute Peritonitis, in 1, Disease of the Liver, in 1, Disease of the Supra-renal Capsules, in 1, Enteritis, in 1, Carcinoma of the Breast, in 1 Phlegmonous Inflammation of the scalp, and the Decay of Old Age in 3. Post-mortem Examinations were made in 40 cases. We have had no death for which a Coroner's Inquest was required.

The admissions, I am sorry to say still consist of hopeless cases of Dementia, Imbecility, Senility, &c., &c., which occupy space and entail an outlay that might be more profitably employed. The total number of patients now in the Asylum, in whom there is the slightest prospect of recovery, amounts to 50 only, and among these several I fear, must be classed as doubtful.

The attempts at escape have been unprecedentedly few ; one male patient however, succeeded in getting clear of the grounds, but was soon re-captured.

The health of the patients continued remarkably good, until the last two weeks of December, when owing to almost Arctic Weather, many of the aged and infirm were attacked with Bronchitis and Pneumonia.

There have been but 3 accidents requiring any notice, viz : one case of fracture of the neck of thigh, and 2 of dislocation of the shoulder.

I am thankful to say, I have no death to record from suicide, although several of the patients attempted self-destruction in various ways ; these attempts however must be expected, in Asylums which always contain a proportion of patients in whom suicide is a fixed determination of the will, the all-absorbing subject of their thoughts, and object of their lives.

One woman threw herself out of a window, and fell 30 feet, she sustained a serious contusion with concussion of the spine and brain ; for several days her life was in jeopardy, she however recovered from the injury and (as is not uncommon in such cases) seemed mentally the better for it.

A male epileptic died suddenly apparently from spasm of the glottis supervening upon 2 fits, which he had in rapid succession ; this patient slept in an associated room, under the care of a special attendant, who was at his bed-side at the moment of the attack, and who being struck with its peculiarity sent for one of the Medical Officers, but it was then too late to perform tracheotomy ; the patient being in articulo mortis. Had this man been visited, only, every hour as was formerly the practice, he would, in all probability, not have been seen alive ; and had his head been at all entangled in the clothes, as commonly happens, death would have been ascribed to "suffocation during an Epileptic Seizure." Post-mortem Examination, as a rule simply reveals a congested state of the Brain, and does not, therefore, help us much in such a doubtful case.

A portion of the New Ward was brought into use, September 18th, when our 14 female patients returned from the Northampton Asylum ; many of these had improved physically, but not mentally, and one was discharged during her stay there.

The remainder of the additional building has since September 18th, been completed and occupied; the work of levelling the extra piece of Garden Ground, for the exercise of the patients, is progressing steadily.

The new building is a " fac-simile " of that erected 5 years ago, with this exception, that there is but one day room, (67 feet by 25 feet wide) instead of 2 rooms, a plan attended with many advantages.

The arrangements for extinguishing fire are now complete, and efficient, there is a hydrant with sufficient length of hose to reach each floor and there are buckets (with water) hanging conveniently near. Outside, there are moreover, hydrants at various distances which command every portion of the building. A certain pressure of steam is kept on during the night and the fire is banked up, so that pumping can be commenced at a moment's notice ; we are able to draw from the river, so that our supply would I hope be inexhaustible. In each wing is an alarm bell accessible to the in-door night attendants, and also to the out-door patrol, whose duty it will be to visit the buildings and keep a vigilant watch during the night.

During the year, the full employment of the patients, according to their several capacities, has been as carefully attended to as in former years ; and I may say the same of recreation and amusements, which are so necessary as a relief from the dull monotony of their lives ; these are aids in their moral treatment, without which I believe, there would be very little willing work executed especially by the female part of our community.

For some years past the friends and relatives of our patients, as well as non official visitors, have been induced to inspect the wards of this Asylum, and have

thus been disabused of their absurd ideas as to the behaviour of lunatics, and our treatment of them. The impression however that patients are smothered, still exists in the minds of many of the Norfolk rustics, and I have been requested, on several occasions, to show them "as a favor," the room in which we smother the more violent lunatics!!

Dr. Shaw resigned the post of Assistant Medical Officer in August, and was succeeded by Mr. Francis Seymour, whose previous knowledge and experience in Asylum management, together with his general attainments and gentlemanly deportment, lead me, to believe he will continue to prove an able and trustworthy as well as an agreeable coadjutor.

WILLIAM C. HILLS, M.D.

MEDICAL SUPERINTENDENT.

The Commissioners in Lunacy inspected the Asylum in July last, and made the following Report.

NORFOLK COUNTY ASYLUM,
JULY 9TH, 1874.

There are now 184 men and 287 women, making a total of 471 patients, on the books of this Asylum, of the latter two are at present absent on trial. The weekly rate is now 9s. 6d. The following changes have taken place since the 24th of March, 1873, the date of the last visit to this Asylum:—

		M.	F.	Total.
Admitted	...	75	117	192
Discharged	...	43	73	116
Died	...	32	36	68

With reference to the above figures, it may be remarked that of those admitted 10 men and 22 women were re-admissions, of those discharged 91 are returned as having recovered, and amongst them are included 15 women who were removed to the Northampton Asylum. There is nothing special to mention with relation to the deaths, the chief causes of them were Phthisis and general Paralysis, diseases which were fatal in 12 and 10 instances respectively. Two deaths resulted from suffocation during an Epileptic seizure; but this was previous to the introduction of arrangements by which all the Epileptic and suicidal cases are placed together in one ward in each division, with special night attendants sitting up in the rooms, a system of

supervision which we were informed works most satisfactorily, but as the number of epileptics on the male side exceeds that on the female, there is not room for 4 or 5 of them in the special ward.

No suicide has occurred, neither has there been any inquest.

Post-mortem examinations have been made in 43 cases—There are many old feeble and paralytic inmates, but the bodily health of the Patients is generally good, there are not more than 8 Men and 18 Women registered as under Medical Treatment, and only one woman was to day in bed, we found no one in seclusion, which since the last visit has not been employed, except in the cases of 10 women, one of these on two occasions and the others on one each. Two women have been restrained by means of leather gloves, the one for two weeks, and the other for a week and two days, and both for surgical reasons.

The Patients on both sides were very free from excitement and none made any complaints to us (though they were all seen except the two women away on trial) on the ground of the want of proper care and attention, or on account of any unkind treatment.

They were clean and tidy in personal appearance, and in a condition, generally, very creditable to those who have the charge of them. The Bedrooms and bedding were very clean, and the Ventilation throughout good; many of the Female Patients were employed at needlework in the dayrooms, which maintain their character for cheerfulness and comfort.

The returns give a total of 188 women usefully employed, of whom 27 work in the Laundry and 7 in the Kitchen. They also shew that 87 of the men are workers—of these 34 are occupied about the grounds and farm, 10 in the kitchen and 17 in different trades. We saw 104 of the Men and 188 of the Women dining together in the Hall. They were perfectly orderly in their behaviour and none made any com-

plaint to us of the diet, which seemed good in quality and well served, There is divine service in the Chapel twice on Sundays, and prayers are read on one day in the week. At the former services the average attendance of both sexes is 362, and the latter 269.

The same system for daily exercise continues and there appears to be abundant opportunities of recreation provided, by means of dances and other entertainments, trips down the river, picnics, and occasional excursions for the day in parties of seven, to Yarmouth or elsewhere.

There is still, in addition to the special attendant in the dormitories where the epileptics sleep, a night attendant in each division, and the returns as to the Wet and Dirty cases, (which last night were not more than 6 on the Male and 4 on the female side) are evidence that their duties are well performed.

Whilst we are able to report thus satisfactorily of the state of this Asylum, we have also to note the following alterations and improvements which have been effected during the past year.

Hydrants have been placed at intervals outside the Asylum, so that water can be thrown on every part of it. They have also been placed on every floor in the female division (though the hose has not yet been supplied) and they are being placed in a similar manner throughout the male division. It is also intended that a policeman should be on duty nightly outside the building, to give an alarm, in the event of fire.

The stone floors in 3 of the bedrooms on the women's side have been replaced by wooden ones, and a similar improvement has been carried out in 2 bedrooms in the other division. There now remain only 2 rooms (a sitting room in each division) having stone floors, and these we hope will not be allowed to be there much longer.

A bay window has been thrown out opposite the fire place in the Corridor of the female ward, No. 7.

The new Mess Room for the female attendants is now being used by them. The one for the men is not yet finished.

In the male ward, No. 1, one of the single rooms has been converted into a scullery, and an additional water closet provided. This has also been done in No. 6. A similar improvement is being carried out in each of the male wards, and when the space can be afforded by the completion of the additional accommodation for the female wards, will also be effected in that division.

The Cemetery Chapel and the Cemetery have been put into good and proper order.

A new kitchen range and 2 boilers at the back of it for supplying steam for cooking purposes, have been put up.

The additions to the laundry buildings are proceeding, and so is the construction of the new female ward, though it will be some time before either will be completed, we trust that every effort will be made to finish this building as soon as possible, for the additional space is urgently required, there being at present 13 female patients in the Asylum more than it is intended to accommodate.

On the men's side there are 10 vacant beds.

We have satisfaction in stating that the case books are well entered up by Dr. Shaw, the Assistant Medical Officer, who had been recently appointed at the date of the last visit.

Signed,

GREVILLE HOWARD,	}	Commissioners in Lunacy.
ROBERT NAIRNE.
